

# Benefits of Ironton Global SIP Trunks

---

Whether your business is looking for flexibility in acquiring phone numbers from anywhere in the world, or insuring its high availability and failover, or you are looking to save money all while being resilient and optimizing and leveraging your existing infrastructure, Ironton Global delivers. For 105 years, Ironton Global has been providing phone service with immaculate call quality and best of breed customer service around the clock with 99.999% uptime and reliability. Ironton Global's SIP trunks offer so many advantages:

- 🌀 Ironton Global SIP Trunks eliminate costly voice T1, PRIs (Primary Rate Interfaces) subscriptions and pots lines
- 🌀 Ironton Global saves you considerable money as there is no need to invest in PSTN gateways and additional line cards for your PBX as you grow
- 🌀 Adding new Ironton Global SIP trunks provide a far greater value as they are lower cost, and take very little effort to bring up as opposed to the legacy phone lines
- 🌀 Ironton Global SIP trunks allow you to have optimal utilization of your bandwidth by delivering both data and voice in the same connection
- 🌀 Maximum flexibility in dimensioning and usage of lines as you avoid having to buy capacity in chunks of 23 (PRI)
- 🌀 Calls to anywhere worldwide can be made for the cost of a local one using our unlimited International call plans
- 🌀 Disaster recovery is built-in on Ironton Global trunks. If your PBX or even your IP phone fails, we can reroute your call to a phone number of your choice (i.e. your cell phone). This can be done down to the DID level.
- 🌀 Flexible plans: Ironton Global has different kind of SIP plans, as an example, unlimited calling domestic U.S. or Continental or International, saving you lots of money on your Long Distance bill or simply eliminating it
- 🌀 Ironton Global facilitates the experience. The products are simple to install, simple to maintain, and simple to grow, giving you an elastic model that enables productivity in a short time
- 🌀 Ironton Global offers a choice of multiple E911 with Ironton Global SIP Trunks
- 🌀 Ironton Global SIP trunks allow you to add DIDs from 97% of the US and Canada, as well as most International locations. Establish a point of presence and make your business "local"
- 🌀 Ironton Global SIP trunks offer you the ability to have a phone number in your business from just about any area in the world. Need a Paris phone number? No problem
- 🌀 Porting your existing legacy phone numbers to us? Ironton Global reduces this task to a transparent process that happens rapidly
- 🌀 Want new service? You do not need to wait a month. Ask Ironton Global about our expedited services
- 🌀 Have multiple locations or teleworkers? Ironton Global SIP trunks can be installed nearly anywhere where an internet connection exists and will allow you to interconnect your organization, regardless of its size, location or fragmentation. Re-unite all your workers with Ironton Global SIP telephony
